Quality Guaranteed Electric Bikes!

Welcome to the world of FreeGo Electric Bikes.

FreeGo

ELECTRIC BIKES

A FreeGo electric bike provides you with the FREEdom to GO where you want with the minimum of effort!

All information in this catalogue supersedes any information in previous catalogues.

About FreeGo Electric Bikes

All our bikes have hand-built frames and quality components.

We aim to offer the VERY BEST electric bikes in the UK with the widest choice; the best specification at prices that cannot be beaten when compared to similar electric bikes.

With the environment being a fundamental part of our ethos we have branded our bikes ‘FreeGo’. A FreeGo electric bike provides you with the FREEdom to GO where you want with the minimum of effort!

Our range of electric bikes include the Hawk, the Eagle and the Folding Bike, all complimented by the stylish Regency. All our FreeGo bikes are available with either a 36V 10Ah or 36V 16Ah battery.

FreeGo electric bikes are available in traditional crossbar, step-through and mountain bike derivatives in a variety of colours.

... we've got the perfect electric bike for you!

Understanding “The Battery”

The performance of an electric bike is measured by its ability to assist in climbing hills* and how far it will run on the flat at a constant speed. This depends on a light frame, low friction, a highly efficient electric motor and also on the energy stored in the battery.

The energy stored is the fuel for the bike!

Useful technical battery info...

In a battery of specified voltage (V), energy stored is measured in ampere hours (Ah). This measure indicates how many hours a battery can produce a fixed current - amps (A).

Therefore, the high voltage 36V 16Ah lithium polymer battery provides an impressive performance when travelling longer distances.

Please read carefully your User Manual for guidance on how to maximise the performance and life of your battery.

* Pedal assist will help to preserve your battery.

Frequently Asked Questions

If you are new to the world of electric bikes, these questions and answers may be just what you need to try and understand all the benefits. If you still can't find what you want to know then please call us as we will be happy to put your mind at rest!

Electric Bike FAQ

Q. Do I need to wear a crash helmet when I ride my Electric Bike?
Although it's not a legal requirement **we would strongly recommend that you wear one when riding your electric bike.**

Q. What servicing will my Electric Bike require?
We recommend that you have it serviced once a year.

Q. Will my Electric Bike need an MOT?
Your electric bike does not need any form of MOT.

Q. How long is the lifespan of my Electric Bike battery?
The life of your Freego electric bike battery varies depending on how much you use it. They are guaranteed for 2 years against a total failure. They should be charged twice a month even when the bike has not been used.

Q. Do I need insurance to ride my Electric Bike?
Although it is not a legal requirement for your electric bike, we strongly recommend that you purchase separate cycle insurance.

Q. Does my Electric Bike come with a warranty?
Your FreeGo electric bike frame has a warranty of 4 years, the battery of 2 years. All other parts, with the exception of brake blocks/pads, tyres, lights and cables etc, have a warranty of 1 year. The Warranty is not transferable.

To qualify for the exchange bike you must be the original owner with the original receipt and have registered your bike with us.
(See page 6/13)

Q. Do I need to register with the DVLA or get road tax?
No.

Q. Is my Electric Bike road legal?
Yes, our electric bikes are fully CE and EN15194 approved.

Q. How do I recharge my Electric Bike?
Your electric bike comes with a mains charger that simply plugs into any mains outlet. A full charge will take 4-6 hours. There are some cities that are installing 'Park and Charge' points where you can as the name suggests park and charge your electric bike. It is advisable to charge your battery up once every 2 weeks even when you are not using it.

Q. Do I get a warning when my battery needs recharging?
Your electric bike has a battery level indicator. When the battery level indicator shows one light the battery will need recharging.

Q. How much will it cost to charge my Electric Bike?
A full re-charge will cost literally pennies from a standard mains socket. Electricity is charged in kWh (Kilo-Watt-Hours), your electric bike uses less than 1kWh to fully charge the battery.

The FreeGo Range of Electric Bikes

We've plenty of reasons why you should choose a FreeGo Electric Bike!

A few good reasons why choosing a FreeGo Electric Bike is the right decision.

Guarantee
If during the first 12 months your FreeGo Electric Bike malfunctions and cannot be repaired within 5 working days it will be replaced with a new electric bike.

This guarantee, **unique to FreeGo Electric Bikes**, shows our confidence in our products and is available to the original purchaser.

Warranty
All Freego Electric Bikes come with Warranties. The separate components have different warranty periods ranging from 1 to 4 years. This warranty plus our Guarantee makes our bikes unbeatable!

After-Care
Once you have purchased your FreeGo electric bike from an appointed dealer, they will be only too pleased to take care of all your servicing needs.

Try Before You Buy
Your dealer will understand that it can be difficult choosing your ideal electric bike, therefore they will encourage you to **Try Before You Buy** so that you are 100% happy and confident with the bike you select.
